EXPERIENCE

Groupize — *Product Designer*

SEP 2025 - PRESENT

- Shaping feature requirements and design direction for new AI-powered features in collaboration with Product and Engineering.
- Designing AI interaction patterns and conversational UX for an AI-first product experience.
- Designed and shipped new product features including Agenda, Calendar, Bid Dashboard, and Inbox.
- Building and iterating on fully interactive prototypes in Claude Code.
- Evolving the Design System to support new product features and patterns.

Adjarabet — *Product Designer*

AUG 2024 - AUG 2025

- Led the redesign and unification of 4 brand UI kits into one Design System, reducing design and development time and improving consistency across teams.
- Built a flexible variable system for efficient brand switching, supporting complex customizations and faster launches for new brands.

AutoCruitment — *Product Designer*

MAY 2023 - SEP 2024

- Shaped the direction for a full platform redesign by identifying key user pain points and aligning stakeholders around clear success metrics.
- Optimized key workflows across user roles, reducing time on task and minimizing errors.
- Designed and launched a new Task Manager feature, improving task visibility, progress tracking, and workload planning across teams.
- Developed a new visual direction, UI Kit, and design guidelines for the platform.

BetVictor — *Product Designer*

JUN 2021 - JUN 2023

- Led the Platform stream, collaborating with developers and stakeholders to align priorities and support smooth delivery.
- Used product analytics to identify user pain points and guide design

Polish and English Philology
2016 — 2021

improvements across the product areas I owned.

- Redesigned the Design System and built a token structure to simplify customization across white-label brands and speed up new brand launches.
- Owned a World Cup campaign feature end-to-end, from concept through usability testing to final delivery.
